

# WaterSentinel®

## WS-10ALK

### ALKALINE WATER FILTER

Delivering great tasting, high quality, pH balanced water directly from your tap. Reverse Osmosis (RO) systems provide superior final barrier protection for your home and family; however, these systems may produce a flavor profile that needs to be enriched. Aquamor is proud to provide solutions to sometimes complex drinking water problems. Our WS-10ALK filter has been specifically designed and engineered to enhance the flavor profile through increased ORP, pH balancing through specialty alkalinity media and lastly through our Far Infrared ceramic media. This specialty formulated ceramic media element will add minerals back in to your RO treated water as well as provide pH balance of the water as needed. This in-line water treatment element is perfect for home RO systems as well as any dedicated filtration system for home, RV or camper.

At Aquamor, we strive to ensure our products are the best quality we can deliver. With our high quality materials, we believe we deliver just that. Our WaterSentinel WS-10ALK Alkaline water filter is no different. With Tourmaline media used in our alkaline water filter, you can be rest assured that you are getting a high quality product.
