

Installation Quick Start Guide for WS-AF2

Important Installation Instructions

- 1 Turn the filter cover to the left to detach from the refrigerator wall.
- 2 Remove the old filter out of the filter cover by pulling it straight out.

- 3 Install your new air filter into the filter cover with "Front" side facing outward.
- 4 Press the filter into the filter cover.
- 5 Place the filter cover onto the refrigerator wall and turn the filter cover to the right.

- 6 Reset the change filter light by pressing and holding the Air Filter button for three seconds.

Caution: To avoid injury and malfunction, do not put finger or other objects inside the fan. Do not wash the Fresh Air Filter with water. It may degrade the performance of the filter. If it is used after the recommended replacement period, the filter performance of deodorization may be degraded.

REPLACE FILTER EVERY 6 MONTHS
